TECHNICAL PROJECTS

MotoMarket | Full Stack REACT Developer | https://motomarket.shop/

Developed a full CRUD REACT Ecommerce site specializing in the sale of motorcycles and components. This app features admin login and registration, image handling using Multer, payment processing through Stripe, S3 buckets for data storage and AWS for deployment.

- Implemented pagination functionality using React, Tailwind and MongoDB, enabling more efficient browsing of product offerings.
- Developed admin CRUD using JWT's allowing full control over products and orders by site admins.
- Utilized Multer for processing image imports in multi-entry forms, storing data in S3 buckets ensuring client side visibility.

PNW Airlines | Full Stack JAVA Developer | https://www.pnwairlines.flights/

A full CRUD JAVA flight reservation site. This app features login and registration for users and admins, intuitive seat selection, payment processing through Stripe, and full CRUD admin functionality.

- Implemented secure payment processing using Stripe, enabling real-time payment processing, reducing security risks and increasing overall user experience.
- Developed login and registration features to ensure user authentication, designed intuitive user forms for efficient data collection and storage.
- Action Verb + Technical Thing You Did + Using What Technology + For What Technical Outcome/Purpose

Hiker Project | Full Stack Python Engineer | [In-process]

Social style application that allows users to join hiking groups to share routes, information and generate random hikes based on weather and location, built with Python, Flask, Javascript, HTML, CSS, Bootstrap and google maps API.

- Implemented in app functionality of google maps to deliver location specific satellite imaging of user supplied coordinates. Using Google Maps API, Python and JavaScript allows users to see specific, off the beaten path locations.
- Utilized MySQL to build a database to store and make retrieval of data streamlined and efficient.
- Integrated CSS libraries with JavaScript increasing the user experience and overall application functionality.

PROFESSIONAL EXPERIENCE

Master Scheduler | King Electrical Mfg Co | Seattle, WA

Feb 2022 - Sept 2022

- Responsible for overseeing all production, custom and development manufacturing builds and schedules increasing factory output by 28% during my first 3 months.
- Designed and implemented a new manufacturing system using MySQL, Excel, VBA. effectively converting from classical manufacturing to pattern production.
- Developed SIOP review management meeting, MPS reviews and strategy, created and implemented recovery plans.

Production Scheduler | *King Electrical Mfg Co* | Seattle, WA
